1 Foreword

The present report was compiled by the Course Quality Advisory Board (CQAB) of the Erasmus Mundus Student and Alumni Association (EMA) with the main purpose of providing Erasmus Mundus Joint Master Degree (EMJMD) courses with customized student feedback that emerged from the 2015 edition of the Course Quality Student Services (CQSS) survey. This feedback can aid courses in their quest of **improving student services**, and **benchmark** against other course in the Erasmus Mundus umbrella.

The CQSS survey reached its **second edition**. The current edition of the survey brings a number of improvements. Many of these **improvements emerged from the feedback provided by EMJMD consortia** following the release of the previous CQSS survey reports, and **Erasmus Mundus students**. At the recommendation of EMJMD consortia, the course reports now include **comparative information** about each course in relation to the other EMJMD courses that received a sufficient number of responses. At the suggestion of survey respondents, the 2015 CQSS survey edition was released at the end of the academic year, to ensure that all respondents have completed at least two EMJMD semesters before being asked to evaluate their experience. Additional changes have been made to the 2015 edition of the CQSS survey to streamline the survey experience, to facilitate the data analysis process, and to capture information about key subpopulations among EMJMD students. For further reference, a **full description of the methodology** behind the creation of the 2015 edition of the CQSS survey and the analysis procedures behind the CQSS reports has been published in the academic journal **Education Studies Moscow** (<https://vo.hse.ru/en/2016--1/178804999.html>).

Due to our responsibility towards the entire EMJMD community and the over 2000 students and alumni that fully completed our lengthy survey, **the results emerging from the 2015 edition of the CQSS survey will be made available to the broad public on an interactive online platform**. The online platform will contain the graphical information included in this report, and be made available online shortly after the distribution of course reports to EMJMD consortia. By making this information public, CQAB does not aim at classifying or creating rankings among EMJMD courses, but to add transparency to our data analysis, and offer current and prospective students the ability to better prepare for what CQAB considers to be an invaluable educational experience.

The work of CQAB would not exist and could not continue **without the support of numerous committed volunteers spread all across the world**, driven by a strong motivation to help improve the quality of EMJMD courses. During the last 18 months, over 40 volunteers were involved with different stages of the CQSS project, from analyzing feedback received following the 2013 edition of the CQSS survey, to coding qualitative data, interpreting graphical information. **CQAB is grateful, humbled and proud to have supported the CQSS project fully through volunteer work**, and thus without external interference.

Among the CQAB volunteers, two stand out: Mikhail Balyasin and Luis Carvalho. Mikhail is responsible for the substantial improvements to the design and content of course reports, has skilfully generated the graphical information made available in this report, and created the CQSS interactive online platform. Luis coordinated the process of analyzing the vast qualitative data that emerged from the CQSS survey, rethought the architecture of the CQSS survey and helped streamline the survey experience for respondents.

CQAB is grateful for the ongoing support received from the **Erasmus Mundus Student and Alumni Association, and its leadership structures**. We are indebted to representatives of the **European Commission**, and **EMJMD course coordinators** whom we consider allies in a joint quest of consolidating the excellence brand of EMJMDs.

CQAB is eager to receive further feedback from each course coordinator and other stakeholders on how future CQSS reports and their contents may be improved in order to maximize their usefulness. We understand that courses themselves are best suited to address quality concerns, and we strongly suggest that the information in this report, with its limitations, is triangulated with internally available data at the level of each course.

Please address all questions and remarks about this report to Georgiana Mihut at cqab.chair@em-a.eu.

With gratitude and hope for a fruitful future collaboration,
Georgiana Mihut, Chair of the Course Quality Advisory Board

2 Introduction

2.1 Course Quality Advisory Board

CQAB is an independent advisory body that operates on a voluntary basis as part of the Erasmus Mundus Student and Alumni Association. Its members have not and do not receive financial benefits as a result of their CQAB related activities. Membership to CQAB is assured through a competitive recruitment process among EMA members. Internally, CQAB has three main separate structures:

1. Management of the e-mail account **em.feedback@em-a.eu**, that assists students with pressing quality issues;
2. **Survey Team**, tasked with conducting the CQSS survey;
3. **Communication Team**, a newly created structure aimed at facilitating the promotion of CQAB activities.

CQAB was created as a result of the pressing and constant concerns of EMA members about the quality of the student experiences as part of an Erasmus Mundus course. Internally, CQAB has a variety of tools to capture student concerns and to interact with student representatives from various programs, but the CQSS survey represents its most comprehensive and systematic initiative focused on quality assurance. The inception and design of the CQSS survey is enrooted in the complexity of the EMJMD student experience and driven by two distinct factors: the perceived systemic yet unique issues around quality across joint degree courses, and the general underrepresentation of students in the systemic evaluation of the EMJMD program.

2.2 Introduction to the current report

This report introduces three distinct sources of information. First, it aims to bring to your attention the **39 responses** received from current or past students of MUNDUS MAPP-Erasmus Mundus Master's in Public Policy. The respondents represent **23 distinct nationalities**. Collectively they have spent more than **1173 hours** answering and thinking about the survey questions. The responses are introduced in graphical form for each indicator and dimension captured in the CQSS survey that received 10 or more responses. The graphical information follows the structure illustrated in Figure 1, where the name of the dimension (and often the name of the survey question) appears as a figure header (**Overall satisfaction**), and each indicator is displayed on a separate row. The figure illustrates the proportion of respondents that selected each of the four Likert scale options available. Figure 1 illustrates overall satisfaction of respondents with the course.

Figure 1: Example of graphical distribution of survey responses

Second, for each indicator evaluated through the CQSS survey, comparative data on the aggregated performance among all EMJMD courses with 10 or more responses is introduced (see Table below).

	n	Mean	EM mean	0% - 25%	25% - 50%	50% - 75%	75% - 100%
Course content	39	3.23	3.21	2.54 - 3.06	3.07 - 3.23	3.24 - 3.40	3.41 - 3.70
Enrolling in classes	38	3.45	3.44	2.57 - 3.25	3.26 - 3.45	3.46 - 3.62	3.63 - 3.92
Evaluation methods	38	3.18	3.06	2.23 - 2.88	2.88 - 3.06	3.07 - 3.21	3.22 - 3.76

Each row in Table above represents a distinct indicator evaluated as part of the CQSS survey. Each table includes all indicators which received 10 or more responses and compose a dimension. Tables include

- The number of responses received for each indicator (n);
- The mean for each indicator corresponding to MUNDUS MAPP-Erasmus Mundus Master's in Public Policy (Mean);
- The aggregated mean for the respective indicator across all EMJMD courses (EM mean).

Additionally, the table provides information about the distribution of means across all EMJMD courses with 10 or more responses. The distribution of means is displayed as ranges of means in quartile increments. As such, 25% of all EMJMD courses with 10 or more responses will be found in each of the four columns. The quartile corresponding to the course profiled in each report is highlighted. This display facilitates an easy comparison between a given program and its peers. The means displayed in the comparison tables are obtained by converting Likert-scale survey responses to numeric values. CQSS respondents were asked to evaluate each indicator on a four point Likert-scale, from "Very unsatisfied" or "Disagree" to "Very satisfied" or "Agree". For the purpose of the means utilized in this report, each Likert-scale option corresponds to the following numeric values:

- "Very unsatisfied" or "Disagree" = 1;
- "Unsatisfied" or "Somewhat disagree" = 2;
- "Satisfied" or "Somewhat agree" = 3;
- "Very satisfied" or "Agree" = 4.

Therefore, the average score for any given indicator in a table ranges from a minimum of 1 to a maximum of 4, where 4 represents a perfect score for an indicator.

Third, few of the sections of the report introduce an overall description of the qualitative analysis of relevant open ended questions the CQSS survey asked. These selected sections do not pertain solely to the qualitative answers received for MUNDUS MAPP-Erasmus Mundus Master's in Public Policy, but instead offer the range of positions and issues discussed freely by respondents **across all EMJMD courses**.

The information introduced in this report follows the structure employed by the CQSS survey. Through its design, the CQSS survey aims to capture both the **overall experience** of students within an EMJMD, and the experience students had independently at **each institution attended**. To reflect this dichotomy, each section of the report displays both the **overall evaluation of an indicator**, as reflected by respondents, and **the evaluation of the same or comparable indicator in the context of different universities attended**. The most extensive section of the report focuses on providing information about the **supporting services available to students**. The evaluation of the quality of supporting services available to students is broken down between the following components:

- Support structures received before the start of the EMJMD program;
- Support structures received during the orientation program;
- The general helpfulness of various units and individuals;

4. Support received on various specific student issues.

Additionally to including information about your course, this report tries to offer consortia an insight into the qualitative data received during the CQSS survey. Unfortunately, we were unable to extract exclusively the open responses received from your students. We also felt that in many cases confidentiality could have not been assured if we were to share with you these comments. In return, throughout the report, boxed texts that reflect a general analysis of the open answers received from all CQSS survey respondents are included. These blurbs of text are clearly marked and are not necessarily representative for your course, but they do bring light on some of the challenges faced by EMJMD students in general.

Over 20 volunteers were involved in creating the text accompanying the graphs displayed as part of 78 distinct course reports. Together, these volunteers have written almost 100.000 words. Most of these volunteers, including the coordinating team, are not native english speakers. Despite our best effort to ensure a proper editing and proofreading process, this was simply outside of our capacity. As such, **you may encounter spelling and grammar errors**. At times, the formulation might seem sloppy. We apologize for this. Due to high number of volunteers involved, we were also unable to check the accuracy of all percentage points displayed in the text throughout this report. **You may identify inconsistencies between the written text and the graphs in the report. In all cases, the figures displayed in graphical form are accurate.**

Do not hesitate to contact CQAB if you have any concerns, questions or feedback about the information displayed in this report by writing an e-mail to cqab.chair@em-a.eu.

3 Supporting services

3.1 Support received before the start of the Erasmus Mundus course

The section 3.1 measures student's satisfaction with the support received before the start of the Erasmus Mundus course. In general, students' opinions on the rated aspects vary. The biggest dissatisfaction is measured for "Information about fieldwork" with 10% and 20% of "very unsatisfied" and "somewhat unsatisfied" students, respectively. The lowest number of students are also "very satisfied" about the introduction to this aspect during the orientation program (20%). There is also much dissatisfaction reported with respect to the "Timetable" aspect. Five percent and 26% of the students are "very unsatisfied" and "somewhat unsatisfied" about this item, respectively. As such, the two mentioned indicators fall into the second quartile. The four remaining items were rated quite high and all fall into the third quartile (37%, 41%, 50%, and 61% of the students are "very satisfied" about "Evaluation methods", "Course content", "Enrolling in classes", and "Standards of behavior", respectively). The last mentioned indicator ("Standards of behavior") stands out with a very positive value, with no students dissatisfied about it.

At the Central European University, majority of the students (50% or above) are "very satisfied" about all the items regarding the logistic information and support received before the beginning of the studies, except for "Language courses". The last mentioned indicator ("Language courses") was rated positively by 47% of "somewhat satisfied" and 47% of "very satisfied" students. The biggest number of "somewhat unsatisfied" students was measured for "Accommodation" (29%) and "Banking" (17%). The indicator that stands out with the most positive value is "Local transportation" and "Estimation of living expenses", which recorded 100% satisfaction. At the Erasmus University Rotterdam, the biggest number of "very unsatisfied" students was measured for "Language courses" and "Accommodation" (20% and 11%, respectively). The "Language courses" item has also the lowest number of "very satisfied" answers among all the indicators (40%). Apart from this one aspect, majority of the students (more than 50%) are "very satisfied" about the rated aspects. At the Institut Barcelona d'Estudis Internacionals, there is a bigger dissatisfaction with all the aspects measured. Majority of the students are in total "very dissatisfied" and "somewhat dissatisfied" with "Accommodation" (72%), "Banking" (56%), "Language courses" (81%), and "Visa issues" (70%). At the University of York, majority of the students are in total "somewhat satisfied" and "very satisfied" with all the items regarding the support and logistic information before the start of the course. The biggest number of "somewhat unsatisfied" answers was measured for "Accommodation" (33%) and "Banking" (29%). The most positively rated items were "Visa issues", "Health insurance", and "Local transportation" (64%, 67%, and 77% of "very satisfied" students, respectively).

3.1.1 Consortia

	n	Mean	EM mean	0% - 25%	25% - 50%	50% - 75%	75% - 100%
Course content	39	3.23	3.21	2.54 - 3.06	3.07 - 3.23	3.24 - 3.40	3.41 - 3.70
Enrolling in classes	38	3.45	3.44	2.57 - 3.25	3.26 - 3.45	3.46 - 3.62	3.63 - 3.92

Timetable	38	3.00	3.15	1.94 - 2.96	2.97 - 3.20	3.21 - 3.33	3.34 - 3.80

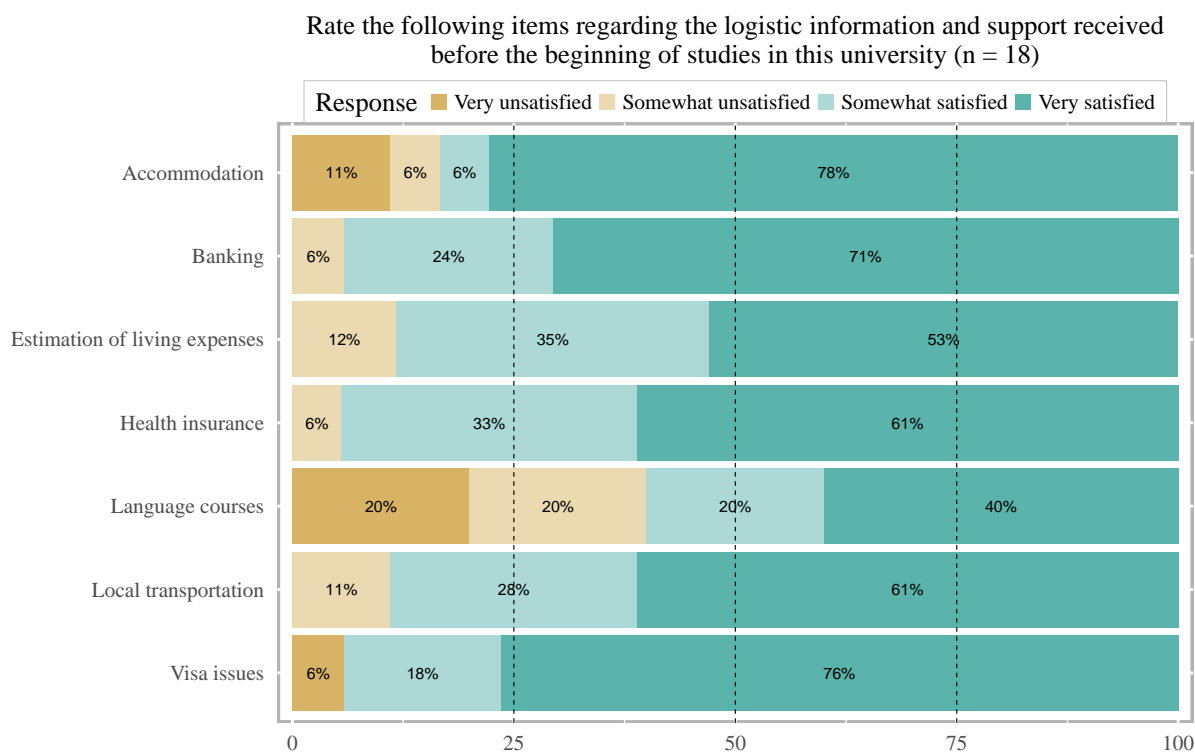

Table 1: Summary statistics

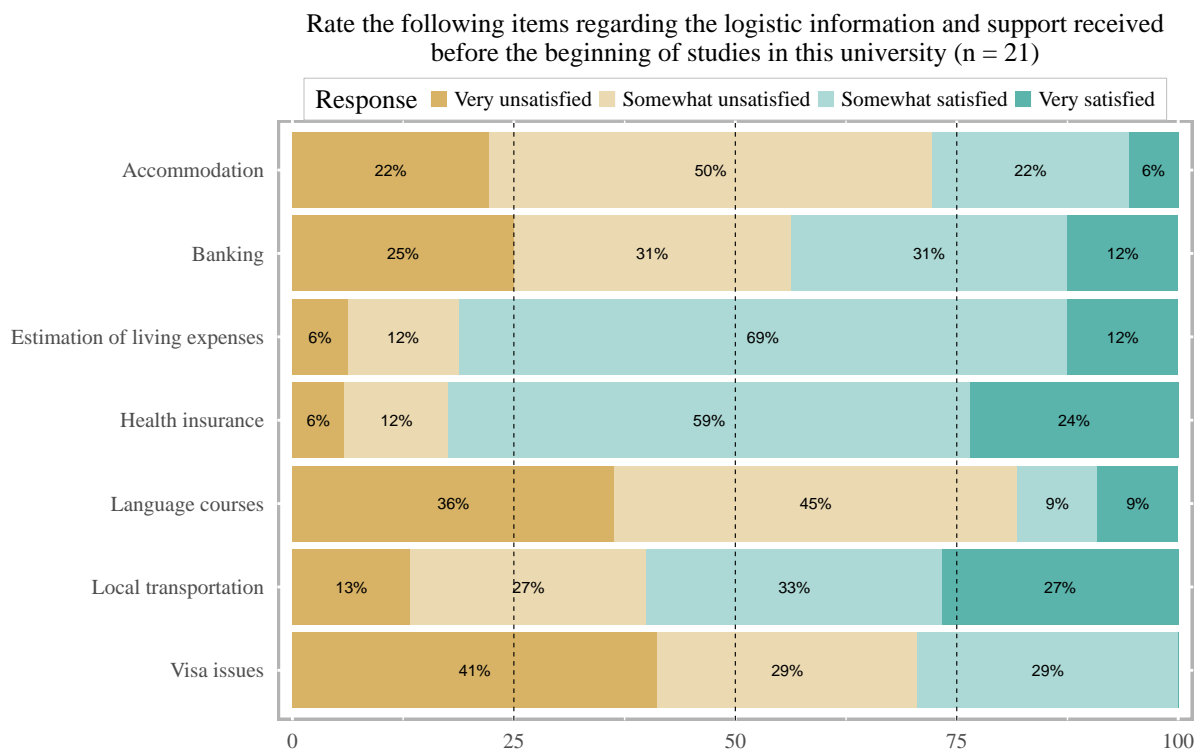

3.1.2 Central European University, Hungary

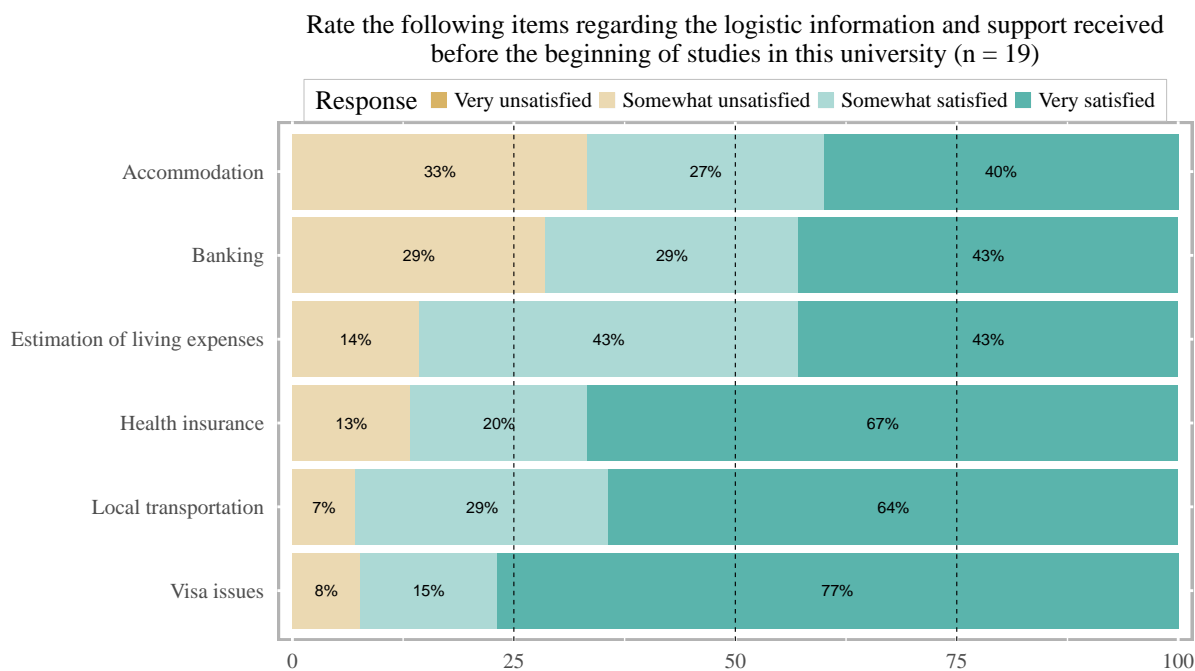

3.1.3 Erasmus University Rotterdam, Netherlands

3.1.4 Institut Barcelona d'Estudis Internacionals, Spain

3.1.5 University of York, United Kingdom

Open answers by CQSS respondents to the question: "Please comment on any other aspect relevant to family relocation throughout Erasmus Mundus Course" (n = 23)

Thirty-nine percent of CQSS respondents considered the family relocation assistance offered by their program administration inadequate due to the lack of help from staff regarding travelling arrangements. Almost half of the respondents reported they have received no assistance at all, and a smaller fraction emphasized financial difficulties faced during their family relocation. Second, 26 percent of the students highlighted the lack of support received from administration staff in securing family accommodation and health insurance. Finally, 17 percent of respondents mentioned that obtaining a visa for family members was problematic. Visa rejections, challenges in visa extension, and lengthy issuing processes were cited as some of the difficulties encountered.

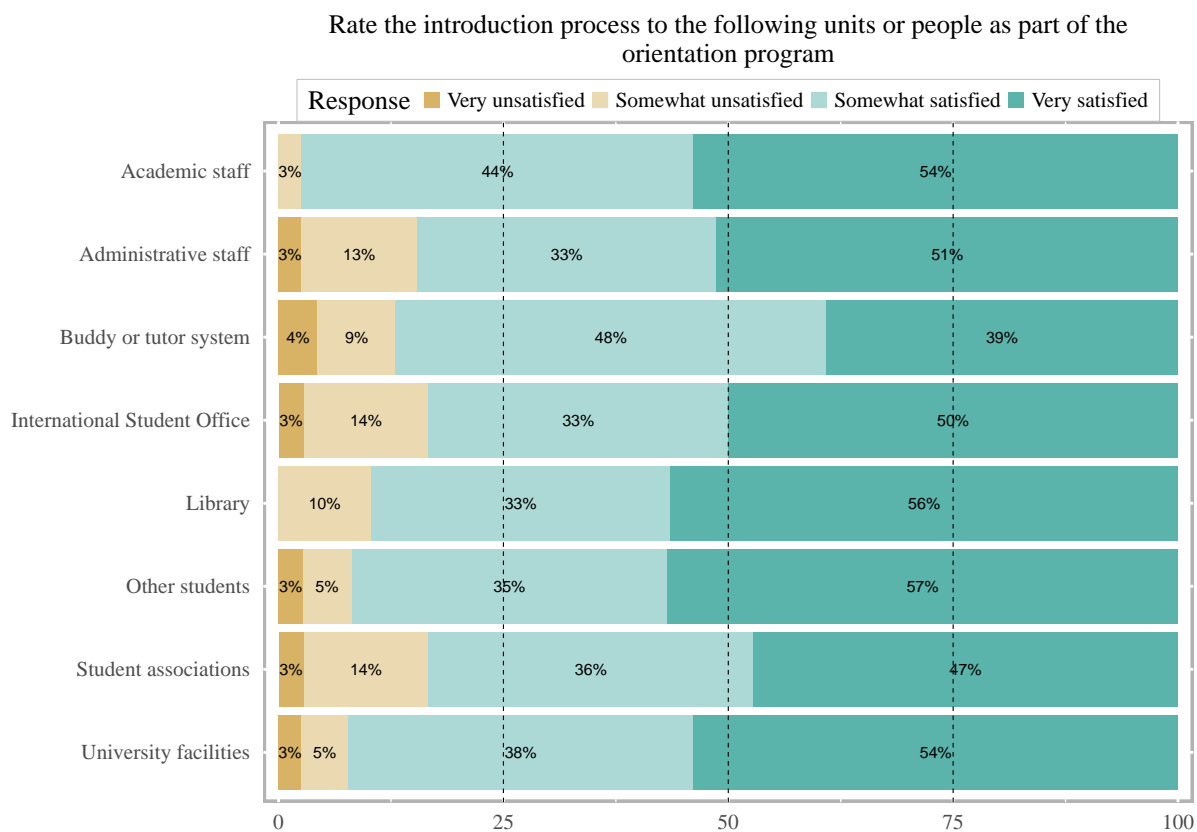

3.2 Support received during the orientation program

In the next section, students rated the quality of the support received during the orientation program. Overall, majority of the students (50% or more) were “very satisfied” with most of the rated items, except for “Buddy or tutor system”, and “Student associations”. There is no more than 4% of “very unsatisfied” and no more than 14% of “somewhat unsatisfied” students, measured for any of the indicators. The only indicator placed in the second quartile is “Administrative staff”, with 3% of “very unsatisfied” and 13% of “somewhat unsatisfied” students. Despite the lowest number of “very satisfied” students, the two indicators “Buddy or tutor system” (39%) , and “Student associations” (47%) are placed in the fourth quartile. The other items fall into the third quartile.

At the Central European University, students are in general “very satisfied” with all of the items regarding the introduction process during the orientation program (from 53% to 89%). The minor number of students are “very unsatisfied” with “Student associations”, “Other students”, and “Administrative staff” (6%, 6%, and 5%, respectively). The most positively rated items are “University facilities” and “Academic staff”, with no unsatisfied students. At the Erasmus University Rotterdam, the items are rated similarly as at the previous university. Majority of the students (50% or more) are “very satisfied” about all the orientation aspects. The biggest number of students is “very unsatisfied” about the “Administrative staff” (11%). The most positively rated item was “Other students” (with 72% of students “very satisfied” with it). Again, there was more dissatisfaction with the orientation aspects at the Institut Barcelona d’Estudis Internacionals. A substantial number of students were “very unsatisfied” with introduction to “Student associations” (42%), “Library” (31%), “Administrative staff” (28%), “University facilities” (17%). Only the “Other students” and “Academic staff” received more positive ratings, with 83% and 78% students being “somewhat satisfied” and “very satisfied” in total, respectively. The University of York was rated more positively with respect to the orientation program. Apart from “Academic staff”, majority of the students (50% or more) are “very satisfied” about the introduction to all of the aspects. The indicator with the highest rating is “International Student Office”, with 91% of the students “very satisfied” with it.

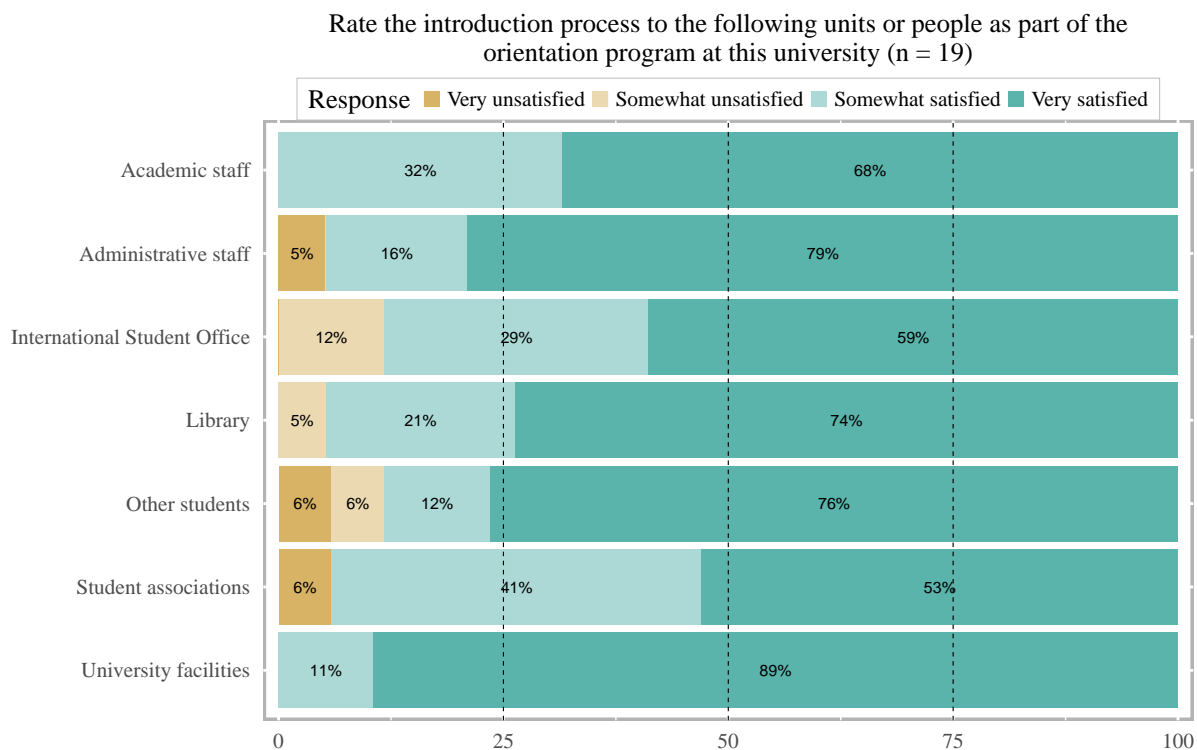

3.2.1 Consortia

	n	Mean	EM mean	0% - 25%	25% - 50%	50% - 75%	75% - 100%
Academic staff	39	3.51	3.46	2.40 - 3.29	3.30 - 3.47	3.48 - 3.63	3.64 - 3.92
Administrative staff	39	3.33	3.40	2.30 - 3.20	3.21 - 3.43	3.44 - 3.62	3.63 - 3.93
Buddy or tutor system	23	3.22	2.97	2.00 - 2.88	2.89 - 3.06	3.07 - 3.20	3.21 - 3.64
International Student Office	36	3.31	3.23	2.47 - 3.04	3.05 - 3.27	3.28 - 3.48	3.49 - 3.90
Library	39	3.46	3.37	2.50 - 3.20	3.21 - 3.35	3.36 - 3.58	3.59 - 3.91
Other students	37	3.46	3.33	2.36 - 3.18	3.19 - 3.36	3.37 - 3.47	3.48 - 3.86
Student associations	36	3.28	2.99	1.92 - 2.76	2.77 - 3.02	3.03 - 3.22	3.23 - 3.62
University facilities	39	3.44	3.39	2.40 - 3.21	3.22 - 3.39	3.40 - 3.57	3.58 - 3.92

Table 2: Summary statistics

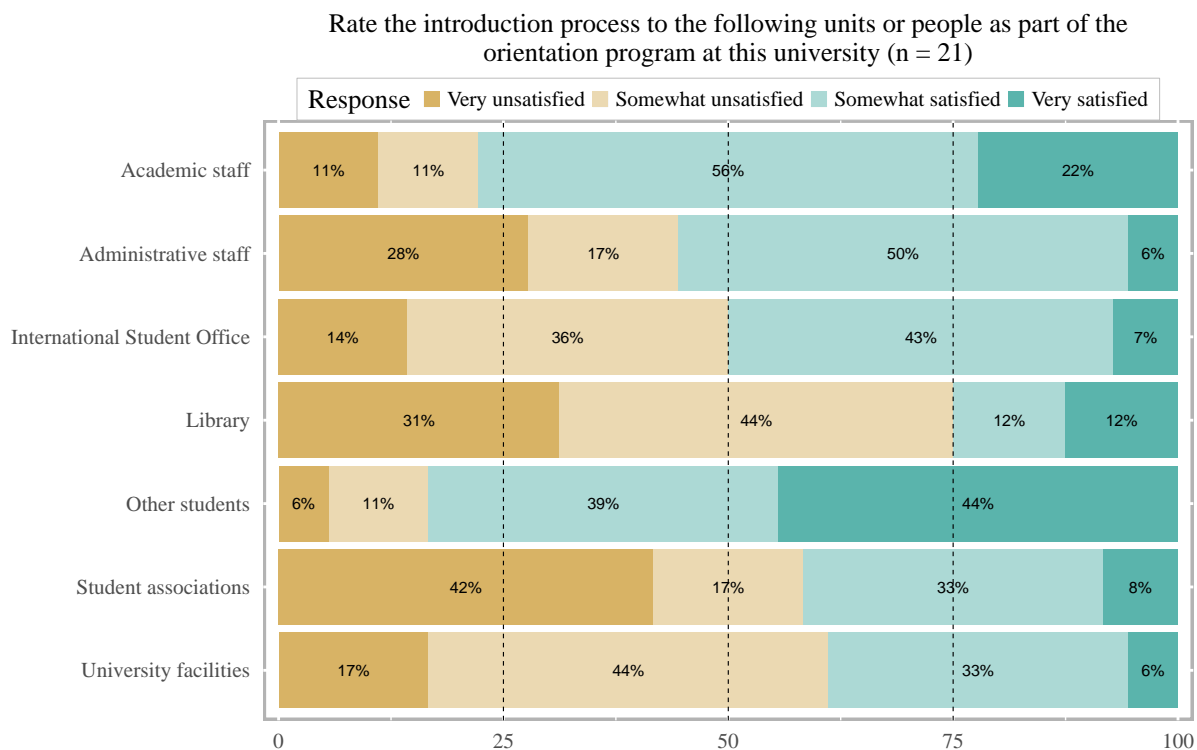

3.2.2 Central European University, Hungary

3.2.3 Erasmus University Rotterdam, Netherlands

3.2.4 Institut Barcelona d'Estudis Internacionals, Spain

3.2.5 University of York, United Kingdom

Open answers by CQSS respondents to the question: "Please comment on any other aspect relevant to the accommodation of disability throughout Erasmus Mundus" (n = 8)

Regarding support to accommodate respondent's disabilities, 37% of respondents highlighted the inadequacy of administrative assistance. Problems related to finding accommodation, poor standard of housing, complicated registration at universities, and lack of organized support from course coordinators constituted the critical issues raised.

3.3 Helpfulness of units and people

In this section, students gave feedback on helpfulness of units and people. In general, students' opinions on the rated indicators vary. The following four rated indicators stand out with a negative value and fall into the first quartile: "Administrative staff", "International Student Office", "Library", and "University facilities". The two indicators with the lowest rating are: "Administrative staff" (with 5% of "very unsatisfied", 21% of "somewhat unsatisfied" and 33% of "very satisfied" students) and "International Student Office" (with 9% of "very unsatisfied", 17% of "somewhat unsatisfied" and 31% of "very satisfied" students). Thirteen percent of the students are "somewhat unsatisfied" with "Academic staff" and this indicator is placed in the second quartile. Similar distribution of answers was also measured for the "Student associations" item, however, it falls into the third quartile. The indicator that stands out with the most positive value is "Buddy or tutor system" as it falls into the fourth quartile (50% of "very satisfied" students). However, the indicator with the biggest percentage of students being "very satisfied" is "Other students" (63%), placed in the third quartile.

At the Central European University, students rated the helpfulness of people very positively, with the majority of students (50% or more) being "very satisfied" with all the units. The biggest number of "very satisfied" answers was measured for "Other students" (82%) and "University facilities" (74%). At the Erasmus University Rotterdam, there is a bit more dissatisfaction with the helpfulness of units of people. However, apart from "Administrative staff" and "Health services", majority of the students (50% or more) are "very satisfied" with all the indicators. The biggest number of students is dissatisfied with "Health services" (6% of "very unsatisfied" and 17% of "somewhat unsatisfied" respondents). Again, the helpfulness of units of people is more dissatisfactory at "Institut Barcelona d'Estudis Internacionals". Majority of the students are in total "very unsatisfied" and "somehow unsatisfied" about "Administrative staff" (61%), "International Student Office" (67%), "Library" (56%), "Student associations" (54%), and "University facilities" (50%). At the University of York, most of the students are "very satisfied" with the helpfulness of units of people (from 60% to 85%).

3.3.1 Consortia

	n	Mean	EM mean	0% - 25%	25% - 50%	50% - 75%	75% - 100%

Open answers by CQSS respondents to the question: "How could orientation and integration experience have been improved" (n = 1443)

The most common suggestion given by respondents (19 %) in response to this question was that each of the universities should offer a **comprehensive international student orientation program**. The orientation program should involve information on health services, transportation, as well as guided sessions to campus facilities, such as library, gym, food courts, and a city tour in the first few days upon arrival. It was suggested that a **complementary Erasmus Mundus focused orientation program** should be provided. This additional orientation session should introduce the academic and administrative personnel, draw expectations, and give an overview of the program structure. Students who arrived after the start of the program due to visa issues, and thus missed the orientation sessions, emphasized the importance of a **special orientation arrangement** for their integration. Additionally, students recommended that their programs **provide an information booklet upon arrival**.

Concerns regarding **administrative assistance** were mentioned by 14 percent of participants. Students requested **better assistance with accommodation and student housing services** on campus. Their responses stated that absence of pre-arrival housing information and arrangements by the program administration reduced the students' chances of finding affordable and conveniently located housing. **Administrative assistance for an efficient visa application processes** was also mentioned. Dealing with visa processes without proper administrative assistance was described to cause distraction from studies. Some respondents particularly emphasized the need for **further administrative assistance** for students that are coming from **non-EU/overseas countries**, and those who are travelling abroad for the first time. Students stressed the importance of **assistance with services which involve bureaucratic processes and paperwork**, as in health services, banking, and local registration upon arrival. Last, students suggested that the program administrations should organize more **social events** and extracurricular activities for students and staff to facilitate integration among program participants.

Third, 10 percent of the respondents drew attention to **challenges faced in communicating with administrative staff**. The responses suggested that the communication flow between students and staff is almost non-existent in some contexts. In some cases staff was not well informed about the nature of the specific master's course, nor prepared to support international students. Longer working hours for existing personnel and recruitment of professional full-time staff are two of the recommendations made by the participants. **Promptness in correspondence** was the second most mentioned improvement area. The students emphasized timely communication of clear and accurate information as crucial for the facilitation of integration. Finally, responses indicated the importance of a qualified administrative staff, responsive to student needs and questions without any language barriers. Students expressed that **insufficient English language** skills of the contact persons at times caused discomfort and stress in their interactions with administrative staff.

Another key issue mentioned by 9 percent respondents was the need for more **interaction and integration with local non-Erasmus Mundus students** through **attending courses together and participating in extracurricular or social activities**. Some respondents mentioned that **residing in campus accommodations** close to local students could play a role in establishing better integration. Respondents also suggested the need for host universities to arrange platforms that create opportunities and facilitate the active engagement of Erasmus Mundus students in their institutions.

Some respondents (6%) also indicated the need to introduce or **strengthen the buddy and tutor support services** in order to assist the smooth integration of students into the new university, city and country. Respondents particularly emphasized the significance of **assigning English speaking tutors**.

3.4 Support received on various issues

In this section, students rated the support received on "Financial issues", "Health insurance" and "Inappropriate conduct or sexual harassment issues". In general, majority of the students are in total "somewhat satisfied" and "very satisfied" about the received support. In the case of "Financial issues", 5% and 14% of

the respondents were “very unsatisfied” and “somewhat unsatisfied”, thus the indicator falls into the first quartile. Despite 62% of the students being “very satisfied” about the “Inappropriate conduct or sexual harassment issues”, this indicator is placed in the second quartile.

At the partner universities students additionally rated “Availability of extracurricular activities” and “Quality of extracurricular activities”. These aspects were rated the highest at the University of York (71% of “very satisfied” students for both aspects and no negative answers). At the Central European University, students were in general “very satisfied” about these aspects (63% for both aspects). At the Erasmus University Rotterdam, there was little less satisfaction with these items (39% and 44% of “very satisfied” students, respectively). Whereas, at the Institut Barcelona d’Estudis Internacionals, students indicated their dissatisfaction (40% and 36% of “very unsatisfied”, respectively).

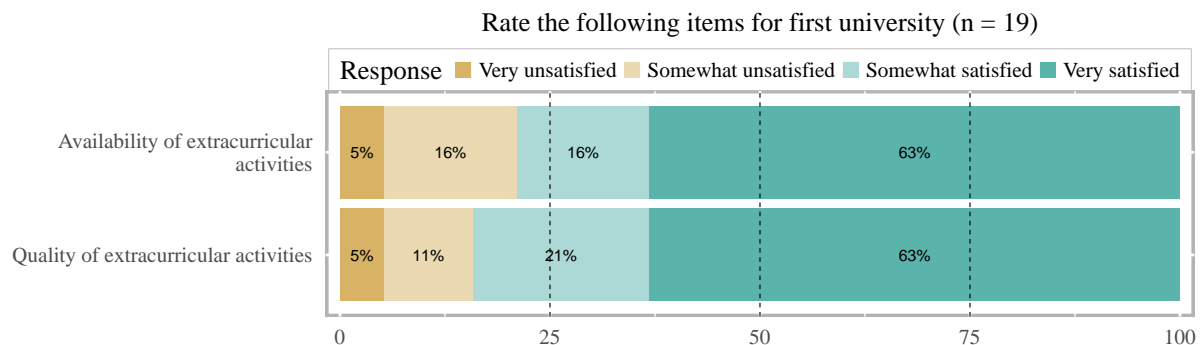

3.4.1 Consortia

	n	Mean	EM mean	0% - 25%	25% - 50%	50% - 75%	75% - 100%
Financial issues	37	3.19	3.34	2.50 - 3.19	3.20 - 3.40	3.41 - 3.57	3.58 - 3.90
Health insurance	37	3.54	3.37	2.54 - 3.25	3.26 - 3.38	3.39 - 3.56	3.57 - 3.84
Inappropriate conduct or sexual harassment issues	16	3.56	3.54	3.22 - 3.50	3.51 - 3.60	3.61 - 3.72	3.73 - 3.76

3.4.5 University of York, United Kingdom

4 Assessment and feedback

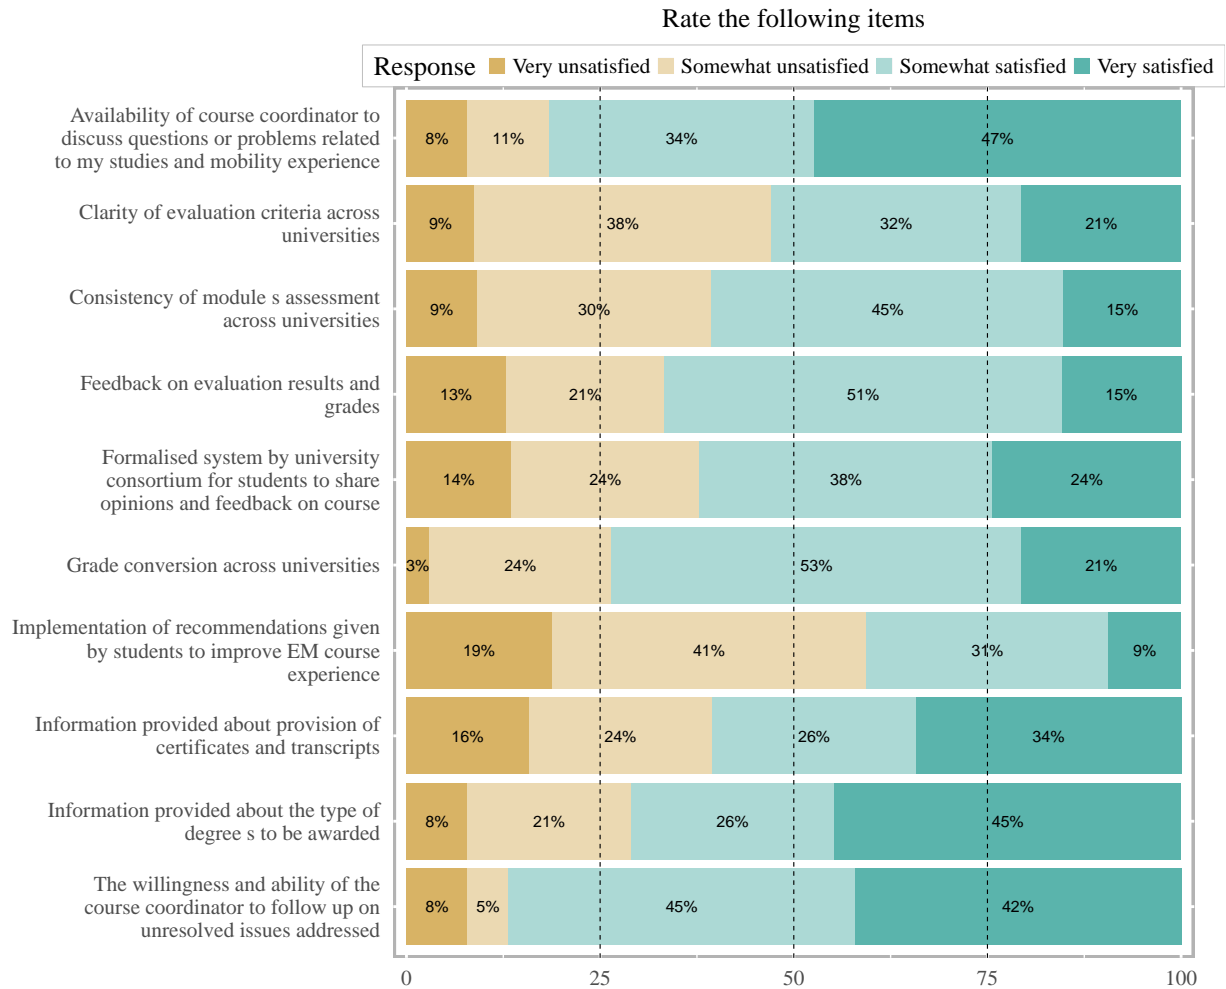

4.1 Module assessment

In this section, a number of items corresponding to the Module assessment were rated. Overall, opinions of the students on the rated indicators widely differ. Students were the most dissatisfied with “Implementation of recommendations given by students to improve EM course experience”, with 19% of them being “very unsatisfied” and 41% of them being “somewhat unsatisfied”. As such, this indicator falls into the first quartile. Another item that was placed in the lowest quartile is “Information provided about provision of certificates and transcripts”, with 40% of “very unsatisfied” and “somewhat unsatisfied” answers in total. Apart from “Grade conversion across universities” all the other indicators fall into the second quartile. A substantial number of students are “very unsatisfied” and “somewhat unsatisfied” in total with “Clarity of evaluation criteria across universities” (47%), “Consistency of modules’ assessment across universities” (39%), “Formalised system by university consortium for students to share opinions and feedback on course” (38%), “Feedback on evaluation results and grades” (34%), and “Information provided about the type of degrees to be awarded” (29%). Despite the similar distribution of answers for “Grade conversion across universities” (27% of “very unsatisfied” and “somewhat unsatisfied” students), this indicator falls into the third quartile. The highest percentage of students is “very satisfied” with “Availability of course coordinator to discuss questions or problems related to my studies and mobility experience” (47%).

The other items pertaining to the Module assessment were also rated at each university. At the Central European University, students are in general “somewhat satisfied” and “very satisfied” with all the aspects. The one indicator that stands out with a more negative value is “Implementation of recommendations given by students to improve EM course experience”, with 17% of the respondents being “very unsatisfied” with this item. In the case of other aspects, approximately 40% of the students are “very satisfied” with them. At the Erasmus University Rotterdam, there is slightly more dissatisfaction reported. The least satisfactory are three items: “Feedback on evaluation results and grades”, “Formalised system through which students can share their opinions and provide feedback on the EM course”, and “Implementation of recommendations given by students to improve EM course experience”, with only 39%, 39%, and 28% of the respondents being “very satisfied”, respectively. At the University of York, the most problematic items is “Ability to provide feedback on the quality of courses” (7% of the students were “very unsatisfied” and 13% “somewhat unsatisfied”). The same number of unsatisfied students (7% of the students were “very unsatisfied” and 13% “somewhat unsatisfied”) was measured for “Feedback on evaluation results and grades”, however there were more “very satisfied” students here (47%). The items of Module assessment were rated more negatively at the Institut Barcelona d’Estudis Internacionals. Here, the biggest number of students is “very unsatisfied” about “Formalised system through which students can share their opinions and provide feedback on the EM course” (38%), “Implementation of recommendations given by students to improve EM course experience” (24%), “Ability to provide feedback on the quality of services offered” (24%), and “Ability to provide feedback on the quality of courses” (22%).

4.1.1 Consortia

	n	Mean	EM mean	0% - 25%	25% - 50%	50% - 75%	75% - 100%
Availability of course coordinator to discuss questions or problems related to my studies and mobility experience	38	3.21	3.30	2.10 - 3.12	3.13 - 3.33	3.34 - 3.49	3.50 - 3.90
Clarity of evaluation criteria across universities	34	2.65	2.78	1.90 - 2.55	2.56 - 2.79	2.80 - 3.00	3.01 - 3.60
Consistency of module s assessment across universities	33	2.67	2.82	1.89 - 2.58	2.59 - 2.79	2.80 - 3.01	3.02 - 3.50
Feedback on evaluation results and grades	39	2.69	2.78	1.70 - 2.57	2.58 - 2.83	2.84 - 3.00	3.01 - 3.60
Formalised system by university consortium for students to share opinions and feedback on course	37	2.73	2.95	1.75 - 2.73	2.74 - 2.97	2.98 - 3.19	3.20 - 3.55
Grade conversion across universities	34	2.91	2.86	2.17 - 2.71	2.72 - 2.83	2.84 - 3.00	3.01 - 3.56
Implementation of recommendations given by students to improve EM course experience	32	2.31	2.84	1.58 - 2.62	2.63 - 2.86	2.87 - 3.15	3.16 - 3.44
Information provided about provision of certificates and transcripts	38	2.79	3.04	1.96 - 2.85	2.86 - 3.07	3.08 - 3.27	3.28 - 3.67

4.1.2 Central European University, Hungary

4.1.3 Erasmus University Rotterdam, Netherlands

4.1.4 Institut Barcelona d'Estudis Internacionals, Spain

4.1.5 University of York, United Kingdom

Open answers by CQSS respondents to the question: "What recommendations would you give to build or improve student feedback channels at the university?" (n = 540)

The following recommendations to improve **feedback mechanisms at the level of the course** were suggested by 30 percent of respondents.

1. **Face-to-discussions**, in the form of group meetings, either in the end of each semester, or regularly during the academic year. Respondents mentioned that these spaces for open discussion could be held in the presence of professors, but also administrative staff, especially course coordinators.
2. **Formalized feedback system**. This plea for having a formal system to collect feedback suggests that at many institutions such systematic mechanisms still do not exist. This does not mean that students cannot express their suggestions or complaints, but that they need to rely on ad-hoc initiatives, often through staff members that assume the responsibility of collecting feedback individually.
3. Implementation of **surveys** as a preferred way to provide feedback.
4. Presence of **online platforms** to centralize the collection of feedback. Some respondents mentioned the possibility of having online surveys, blogs, forums or even an online chatroom.
5. Broaden the focus of assessment during course evaluation.

Eighteen percent of students discussed the quality of **feedback provided by teachers on student's academic performance**. Several students voiced their urge to receive more comments, suggestions and criticism on their academic work. Their replies clearly stated that in many cases they did not receive any **qualitative feedback** focused on improvement in addition to a quantitative grade. Students also expressed the need to have **more detailed evaluation criteria** (e.g., rubrics), in order to have a more transparent grading system. In some cases, students also indicated that the feedback on their work was **overdue**. Lastly, students mentioned a desire to **discuss face-to-face** their examinations and other assessment procedures with their teachers.

Additionally, respondents (13%) mentioned the necessity to receive feedback on "their own provided feedback". Responses suggested that despite the existence of feedback mechanisms, where students could voice their needs or concerns, it was very **uncommon that feedback would produce any effects**.

5 Teaching/learning and supervision

5.1 Teaching/learning

In this section, students gave their feedback on their first supervisors performance. In general, students were satisfied with the cooperation with and availability of their first supervisor. Majority of the respondents “agree” with the statements that: “My supervisor provided valuable advice during my thesis work” (60%), and “My supervisor was available for periodic meetings” (67%). Despite the rather small percentage of students that “disagree” with these statements (7% and 10%, respectively), the indicators fall into the first and second quartiles, accordingly.

5.1.1 Central European University, Hungary

5.1.2 Erasmus University Rotterdam, Netherlands

5.1.3 Institut Barcelona d'Estudis Internacionals, Spain

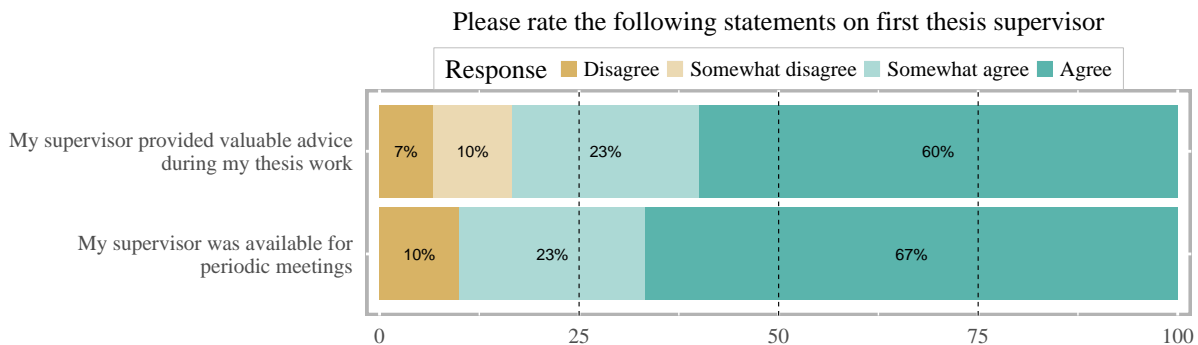

5.1.4 University of York, United Kingdom

5.2 First supervisor

In this section, students gave their feedback on their second supervisor's performance. Overall, students were very satisfied with the cooperation with and availability of their first supervisor. Majority of the students "agree" with the three statements regarding the second supervisor: "My second supervisor was available for consultation if the lead supervisor was unavailable" (76%), "My supervisor provided valuable advice during my thesis work" (67%), and "My supervisor was available for periodic meetings" (81%). However, there was some percentage of students that "disagree" with the first two statements (18% and 7%, respectively). As such, these indicators fall into the second quartile. The third one stands out with a positive value and is placed in the fourth quartile.

	n	Mean	EM mean	0% - 25%	25% - 50%	50% - 75%	75% - 100%
My supervisor provided valuable advice during my thesis work	30	3.37	3.52	2.64 - 3.43	3.44 - 3.60	3.61 - 3.75	3.76 - 4.00
My supervisor was available for periodic meetings	30	3.47	3.55	2.79 - 3.46	3.47 - 3.62	3.63 - 3.80	3.81 - 4.00

Table 6: Summary statistics

Open responses by CQSS respondents to the question: "Please explain your answer regarding the academic satisfaction with course" (n = 650)

The majority of respondents (52%) related their academic satisfaction or dissatisfaction to the **curriculum** of their courses. Many respondents (145) reported being satisfied with curriculum. However, 193 responses stated that the curriculum of their program could be improved. The majority of those who commented negatively on curriculum aspects referenced the low academic level of the program. Some respondents felt that the curriculum they were exposed to did not advance adequately their subject knowledge. They emphasized the lack of practical orientation of the curriculum and the inflexibility in the choice of modules they could take.

Some respondents (13%) addressed the efficiency of coordination between various consortium members and the **consistency of standards across attended universities**. Several respondents were concerned with **significant differences in the quality of teaching** between consortium universities. They suggested that **overlap in contents** between different institutions made some courses redundant. Another major concern was a **difference in assessment methods** among the consortium members which seemed confusing for some of the respondents. A small number of respondents underlined the **lack of administrative coordination and communication** between universities which made mobility between institutions somewhat difficult.

Importantly, 10% of responses emphasized the **positive impact studying as part of an Erasmus Mundus Master's course had on their personal growth** mentioning positive changes in their behavior, having had gained invaluable personal skills and confidence, and referred to their Erasmus Mundus course as a 'life changing experience'.

6 Internship/field experience and personal development

6.1 Personal development

In the next section, the aspect of personal development was rated by the students. Overall, the majority of the students (50% or more) “agree” with the following statements: “I believe my course helped me achieve my current position if employed or student” (62%), “I feel my Erasmus Mundus course prepared me for my career” (52%), “I feel satisfied now about my former experience as an Erasmus Mundus student” (68%), “My soft skills were improved by my course” (53%), and “The course has enabled academic and personal achievement beyond my initial expectations” (53%). The biggest dissatisfaction was measured for the statement that: “My transcripts and certificates were provided in a timely manner”, 40% of the students “disagree” with it. As such the last mentioned indicator is placed in the first quartile, standing out with a negative value. All the other indicators are placed in the second quartile.

Rate the following statements regarding personal development during EM course

	n	Mean	EM mean	0% - 25%	25% - 50%	50% - 75%	75% - 100%
I am satisfied with my current position	25	3.28	3.39	3.00 - 3.25	3.26 - 3.44	3.45 - 3.62	3.63 - 3.79
I believe my course helped me achieve my current position if employed or student	24	3.46	3.47	3.00 - 3.43	3.44 - 3.56	3.57 - 3.72	3.73 - 3.95
I feel my Erasmus Mundus course prepared me for my career	25	3.28	3.36	2.64 - 3.28	3.29 - 3.33	3.34 - 3.54	3.55 - 3.88
I feel satisfied now about my former experience as an Erasmus Mundus student	25	3.64	3.65	3.36 - 3.61	3.62 - 3.69	3.70 - 3.79	3.80 - 4.00
My soft skills were improved by my course	30	3.40	3.50	2.90 - 3.40	3.41 - 3.56	3.57 - 3.71	3.72 - 4.00
My transcripts and certificates were provided in a timely manner	25	2.48	3.21	2.36 - 2.93	2.94 - 3.36	3.37 - 3.62	3.63 - 4.00
The course has enabled academic and personal achievement beyond my initial expectations	30	3.20	3.31	2.46 - 3.20	3.21 - 3.37	3.38 - 3.56	3.57 - 3.91

Table 7: Summary statistics

6.2 Internship

	n	Mean	EM mean	0% - 25%	25% - 50%	50% - 75%	75% - 100%
Duration of internship	22	3.50	3.47	3.00 - 3.35	3.36 - 3.59	3.60 - 3.71	3.72 - 3.90
Logistic support	21	3.14	3.24	2.41 - 3.09	3.10 - 3.25	3.26 - 3.56	3.57 - 3.80
Overall quality of the internship	22	3.45	3.46	2.30 - 3.29	3.30 - 3.50	3.51 - 3.71	3.72 - 4.00
Relevance of internship to current career	17	3.47	3.39	3.00 - 3.07	3.08 - 3.17	3.18 - 3.48	3.49 - 3.92
Relevance to field of study	22	3.68	3.66	2.70 - 3.53	3.54 - 3.68	3.69 - 3.79	3.80 - 4.00
Supervision during internship	22	3.18	3.32	2.60 - 3.18	3.19 - 3.30	3.31 - 3.65	3.66 - 4.00
Timing of internship	22	3.64	3.58	2.90 - 3.59	3.60 - 3.67	3.68 - 3.79	3.80 - 4.00

Table 8: Summary statistics

Open responses by CQSS respondents to the question: "In what way could your course have supported you better to find a job" (n = 37)

When asked about the ways in which their EMJMD course could improve students' prospects of finding a job, 35% of respondents mentioned that **internships** may represent one of the most significant addition to their Erasmus Mundus experience.

Additionally, respondents (27%) highlighted the need to have more **opportunities to engage and network with representatives from the industry and labour market** (e.g. campus activities for recruitment, establish specific networks and partnerships with companies).

Other tangible suggested actions include **the establishment of alumni networks, access to online platforms with job vacancies, mentoring for teachers on career preparation and more practical emphasis as part of the course curriculum.**

7 Acknowledgments

The work of CQAB would not exist and could not continue without the **support of numerous committed volunteers spread all across the world**, driven by a strong motivation to help improve the quality of EMJMD courses. During the last 18 months, over 40 volunteers were involved with different stages of the CQSS project, from analyzing feedback received following the 2013 edition of the CQSS survey, to coding qualitative data and interpreting descriptive graphical information. **CQAB is grateful, humbled and proud to have supported the CQSS project fully through volunteer work**, and thus without external interference.

Georgiana Mihut was responsible for the challenging task of coordinating the 40 CQAB volunteers. She managed the problems and troubles that unavoidably arise during the work of such a diverse group while working on a very demanding task. Georgiana lead and organized all major steps and tasks during the re-design, implementation and data analysis of the survey.

Mikhail Balyasin is responsible for the substantial improvements to the design and content of course reports, has skilfully generated the graphical information made available in this report and all others, and created the CQSS interactive online platform. **Luis Carvalho** coordinated the process of analyzing the vast qualitative data that emerged from the CQSS survey, rethought the architecture of the CQSS survey and helped streamline the survey experience for respondents. **Waqas Ahmed** kindly provided ongoing support with tasks that needed a last minute volunteer. **Patrik Punco** and **Haneen Deeb** worked tirelessly to create the online version of the CQSS survey, and became SurveyMonkey experts in the process. Additionally, **Hannen** was involved in the process of restructuring the survey together with Luis. The new version of the CQSS survey benefited from the proofreading skills of **Tugce Schmitt** and **Chiara Dalla Libera**. **Chiara** has graciously facilitated our internal communication before the creation of a communication team. **Kristina Jaksa**, **Zhanna Saidenova**, **Sayeeda Amber Sayed**, **Rediet Tesfaye** and **Hacer Tarcanli** brought an invaluable contribution to the analysis of the qualitative data emerging from the 2015 CQSS survey. Completing the qualitative analysis was far from being a simple task, and their attention to detail, team effort and systematic approach under the coordination of **Luis** serve as an example of good practice in analyzing large sets of qualitative data.

In the fall of 2015, CQAB conducted a new recruitment process to consolidate its volunteer basis. The new CQAB members provided invaluable contributions towards finalizing the products emerging from the CQSS survey, including the 78 course reports CQAB generated this year. **Aferdita Pustina**, **Eias Hausen**, **Felix Donkor**, **Jacob Sydenham**, **Joanna Dziadkowiec**, **Marsela Giovani Husen**, **Mattia Gusella**, **Pouneh Eftekhari**, **Rishikesh Ganjwe**, **Thuy Van Truong**, **Tiana Vekic**, **Tijana Maksimovic**, **Ana Godonoga**, **Bishnu Sarker**, **Chengjia Wang**, **Daniel Prasetyo**, **Elizabeth Humberstone**, **Habtamu Diriba Garomssa**, **Kseniia Goroshko**, **Nuoya Chen**, **Xinyu Wang**, and **Sonja Song** offered meaning and provided text to the numerous graphs that emerged for each course from the quantitative analysis of the CQSS survey. Combined, these volunteers wrote 91,163 words, or 1169 customized words for each report. Each of them wrote an average of 4144 words.

Primary analyst for that report is **Joanna Dziadkowiec** and *secondary analyst* is **Felix Donkor**.

Muhammad Sohaib Aslam, **Wei Wang**, **Wenjie Shi**, and **Yemi Adeyeye**, members of the newly formed CQAB Communication Team provided support on communication tasks, proofreading and more. **Catherine Lourdes Dy** joined the CQSS task force by provided last minute proofreading help.
